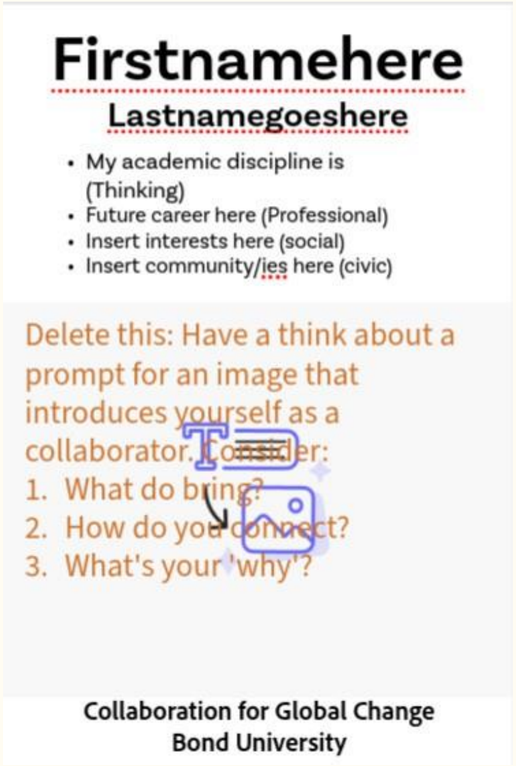
Multi-Modality in Collaboration for Global Change



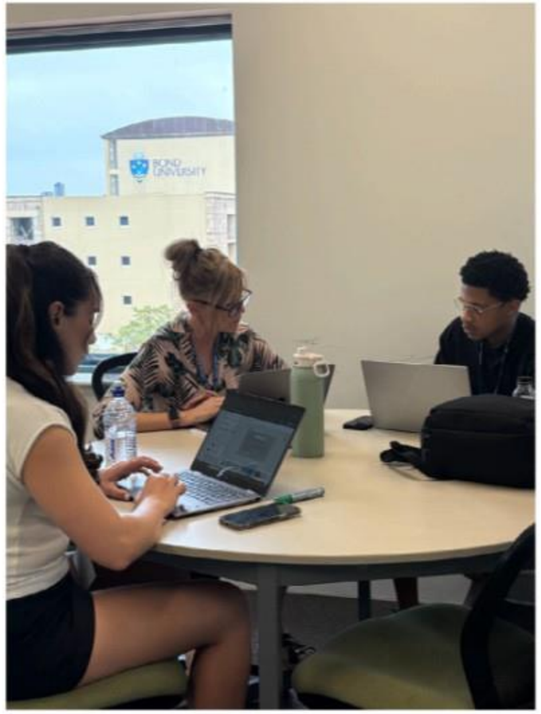
Accountability, Augmenting Critical Thought, and Action

Adding Evidence to Reflective Writing

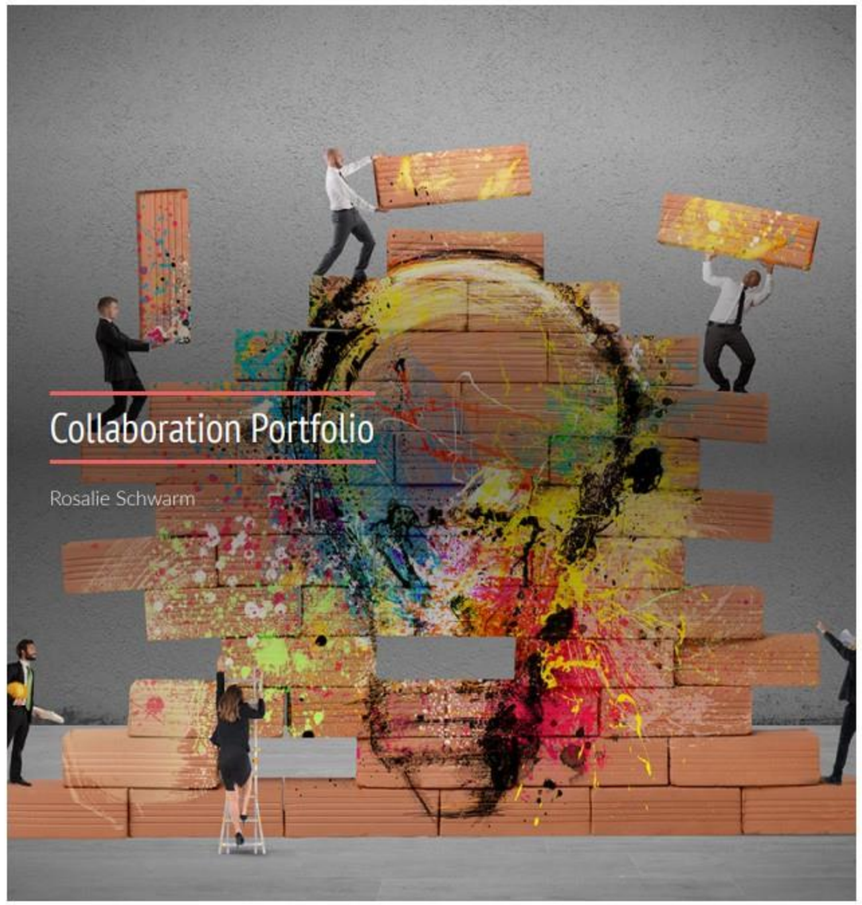
Our group suggested that we should move seating to the edge of the balcony, so students can enjoy the stress-reducing sun and prevent sensory overload, along with bird feeders and nature music playing on speakers (see image below). Our Long-Term view is to transform the space into the image onto the left, where there is lots of greenery and glass that accommodates sun and provides ventilation.

Our Group's use of AI to simulate our suggestions to critique it

Collaborative Tool: Adobe Express - We used this application to place our ideas and suggestions into a common place and look over each other's work.



Team members worked autonomously on designated tasks



Demonstrating Process
