Responding to change with precision

▮

The role of engagement data to support every student's success

Secret Life of Students
February 2022

Times are changing

Pivot to online learning during the pandemic

Widening participation / fair access

Student's behaviour and learning preferences

Defining engagement

We define engagement as participation in 'academically purposeful activity'

Engagement is their participation, not who they are..

- Something they can change

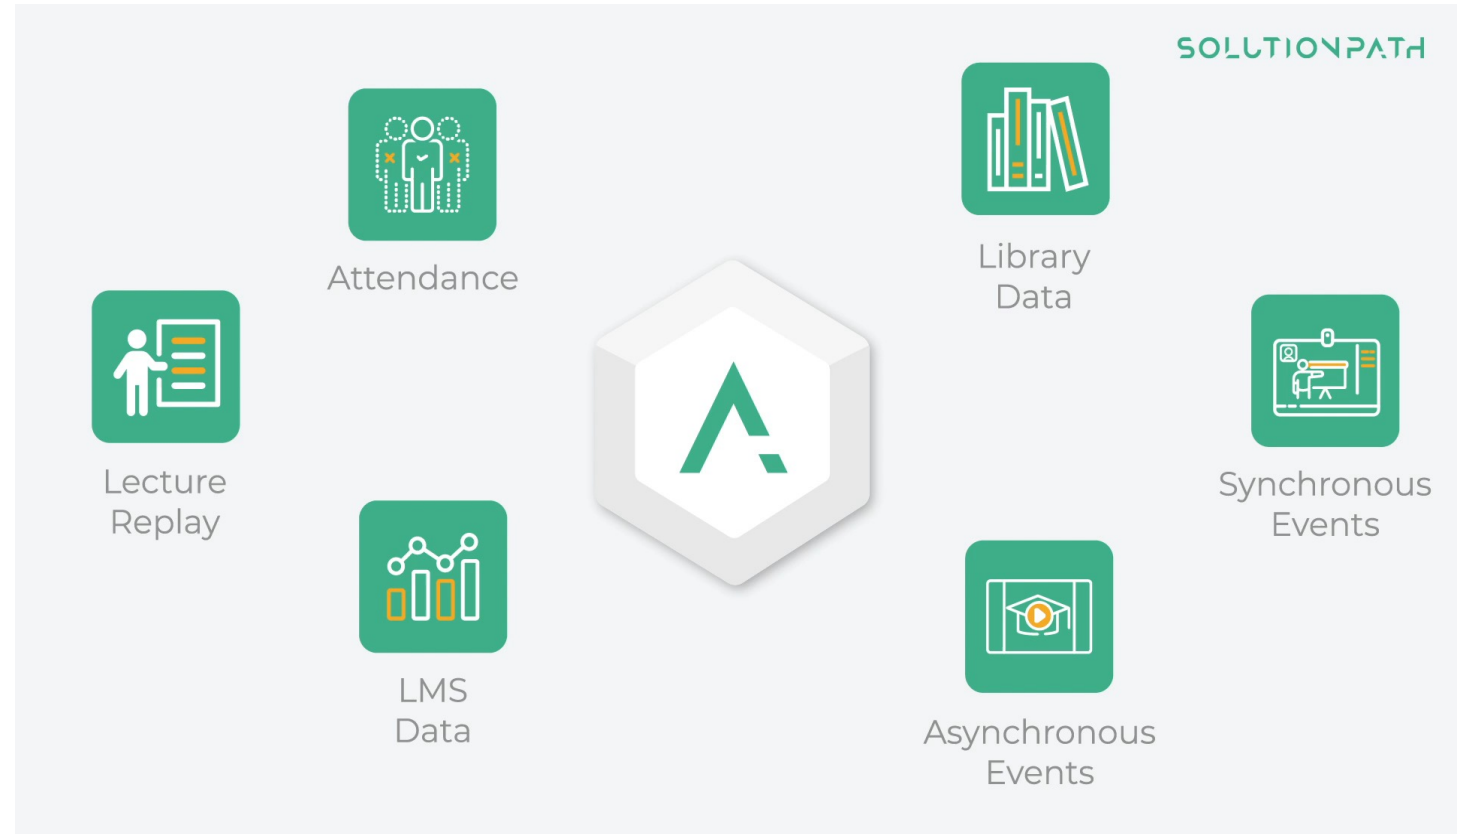

Engagement is a feature of the environment they operate in

- Something you can [& they] change

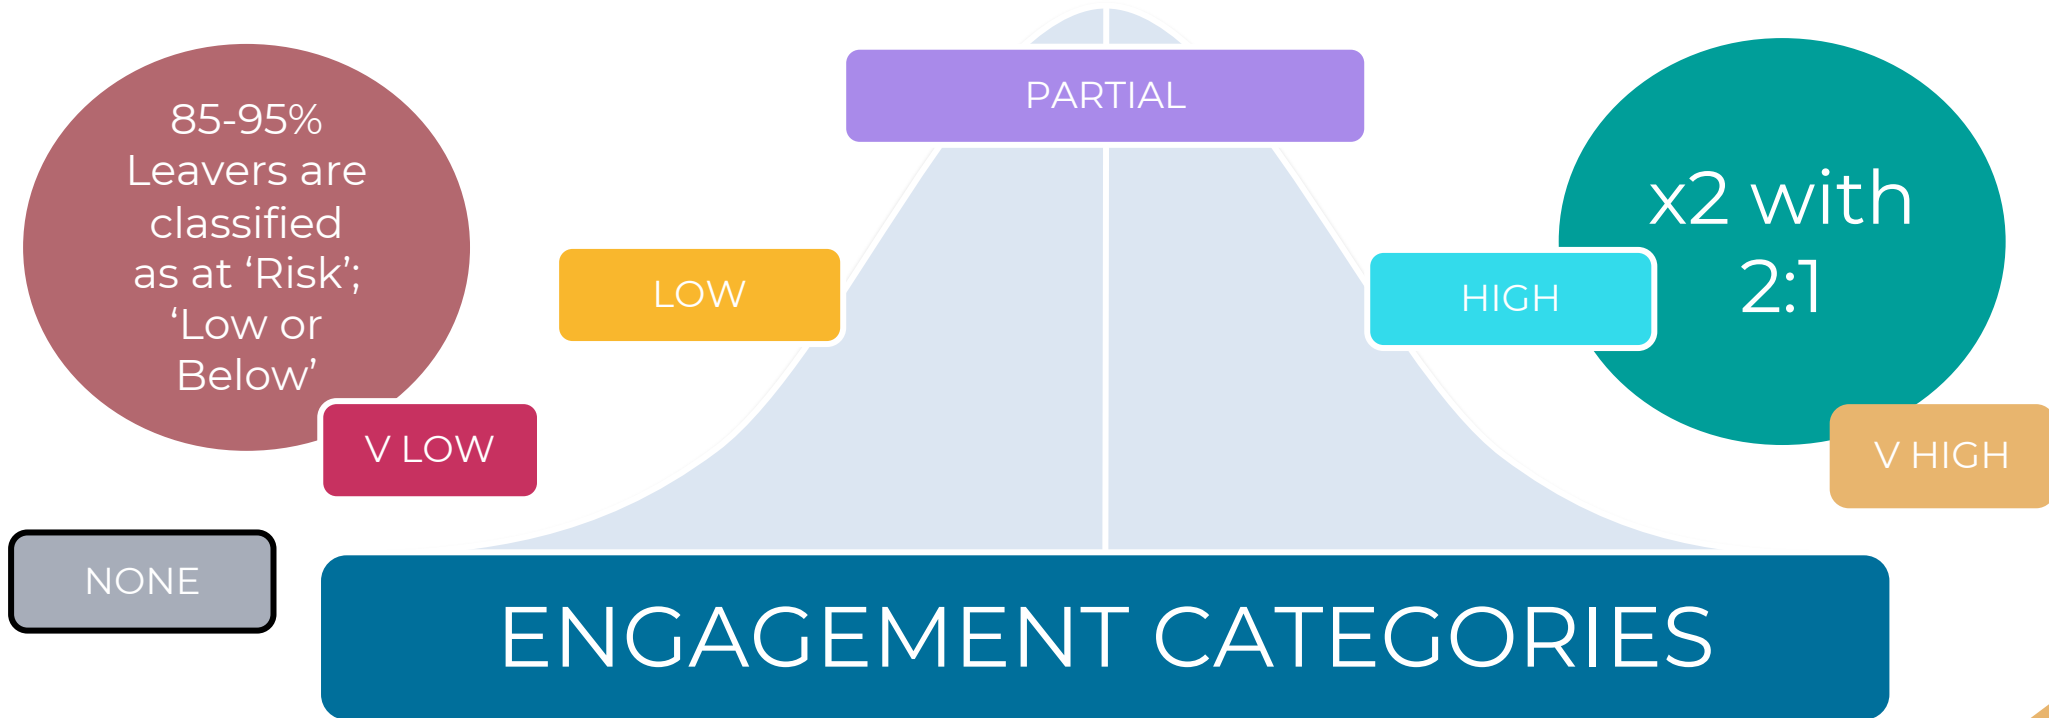

Changes in engagement can act as an indicator to action

- Something to activate a conversation

A universal measure of engagement

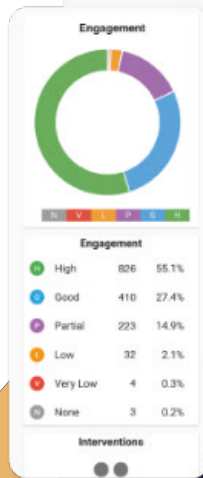

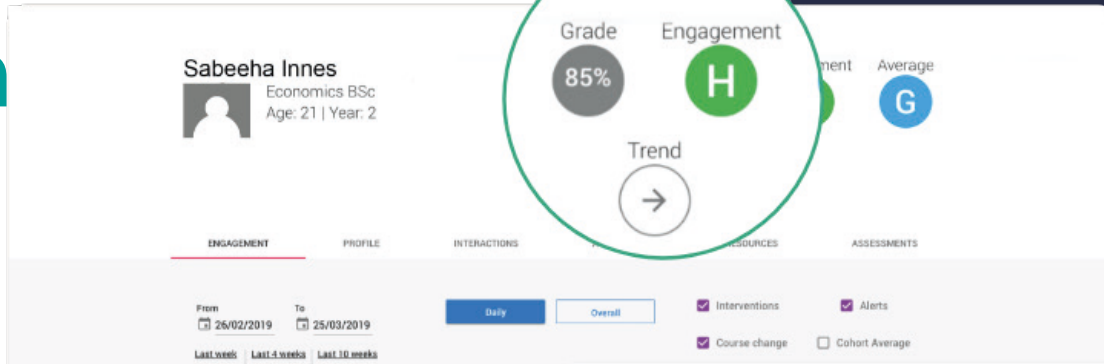

Engagement as a proxy for progression

Manage engagement in a single platform

- Daily engagement rating
- Student and Staff facing dashboards
- Alerts and interventions
- Records, notes and referrals

Search for student

My students

Here is a list of all your student. Use the filters on the left to refine your list.
