Kortext

Setting the Curve

18th October 2023

Microsoft partnership

- Scaled **Azure data warehouse** (Fabric) & **OEA Connector** partner
- **4m** eBooks and Educational **videos**
- AI tooling with **Azure Cog** services, **GPT3.5 Turbo** and now leveraging **Azure GPT4** with Kortext & university data and content
- Working to connect in **key O365 product suite workflows** – Kortext to Teams/OneNote/Word
- Architected to leverage **other AI capabilities** if required

A personal content & learning space for every student

All required learning resources for your course, including educational videos

Upload Academic notes/PPTs/journal articles/course guides etc.

Access, upload non-DRM protected content from your library

Full collaboration and workbook functionality for deeper engagement

Embedded AI-powered learning tools for students on all content

Instant online student support

The image displays several overlapping screenshots of the Kortex learning platform interface. The top-left screenshot shows a 'Books' collection with titles like 'BIM and Construction Management', 'Biology', 'Biomedical Science', 'Bion and Thermodynamics', and 'Change Management'. The top-right screenshot shows a 'MODULE GUIDE: PSYCHOSOCIAL PERSPECTIVES ACROSS THE LIFECOURSE' with details on version, level, and learning outcomes. The middle-left screenshot shows 'Search Results for "philosophy"' with various video results. The middle-right screenshot shows a 'Biomeasurement' page with an 'Add note' dialog box. The bottom-left screenshot shows a language translation tool for English and Spanish. The bottom-right screenshot shows a data table for 'Females' with weights ranging from 8.51 to 14.00.

Gen AI is now in use on the platform!

Mark East
Senior Director, EMEA Regional
Business Leader, Education
Industry, Microsoft:

“We believe AI will, over time, be transformative in education. Working closely with Kortex to help deliver AI-powered study tools that leverage engagement data and relevant learning materials, and which are not impacted by referencing general internet content, is a novel and unique approach, and one we are delighted to support.

“We are excited to continue to work with Kortex as they add new capabilities to these tool sets and present new opportunities and experiences to their university customers and their students.”

Matthew Lawson
Director of Library & Student
Support at Middlesex
University

“We have used the Kortex platform for some years now to serve learning content to students and we are now actively using the StREAM predictive learning analytics platform too. So, adding these Kortex Premium generative AI tools to the student experience seemed a natural next step and we are excited to learn how students use these capabilities in the context of their studies and their impact on progression and outcomes.”

Dr David Sexton
Principal at Anglia Ruskin
University London (ARUL)

ARUL are expanding their use of Kortex by launching the tools to students this semester:

“We are clear that our university has to continue to invest in delivering unrivalled student experiences and supporting students so they can study, anytime, anywhere that works for them and engage with their course and materials, leveraging new technologies as they become available.

“We are intrigued to learn how, when and why students use these new capabilities.”

Olivia Walsby
Head of Teaching Collections,
University of Manchester

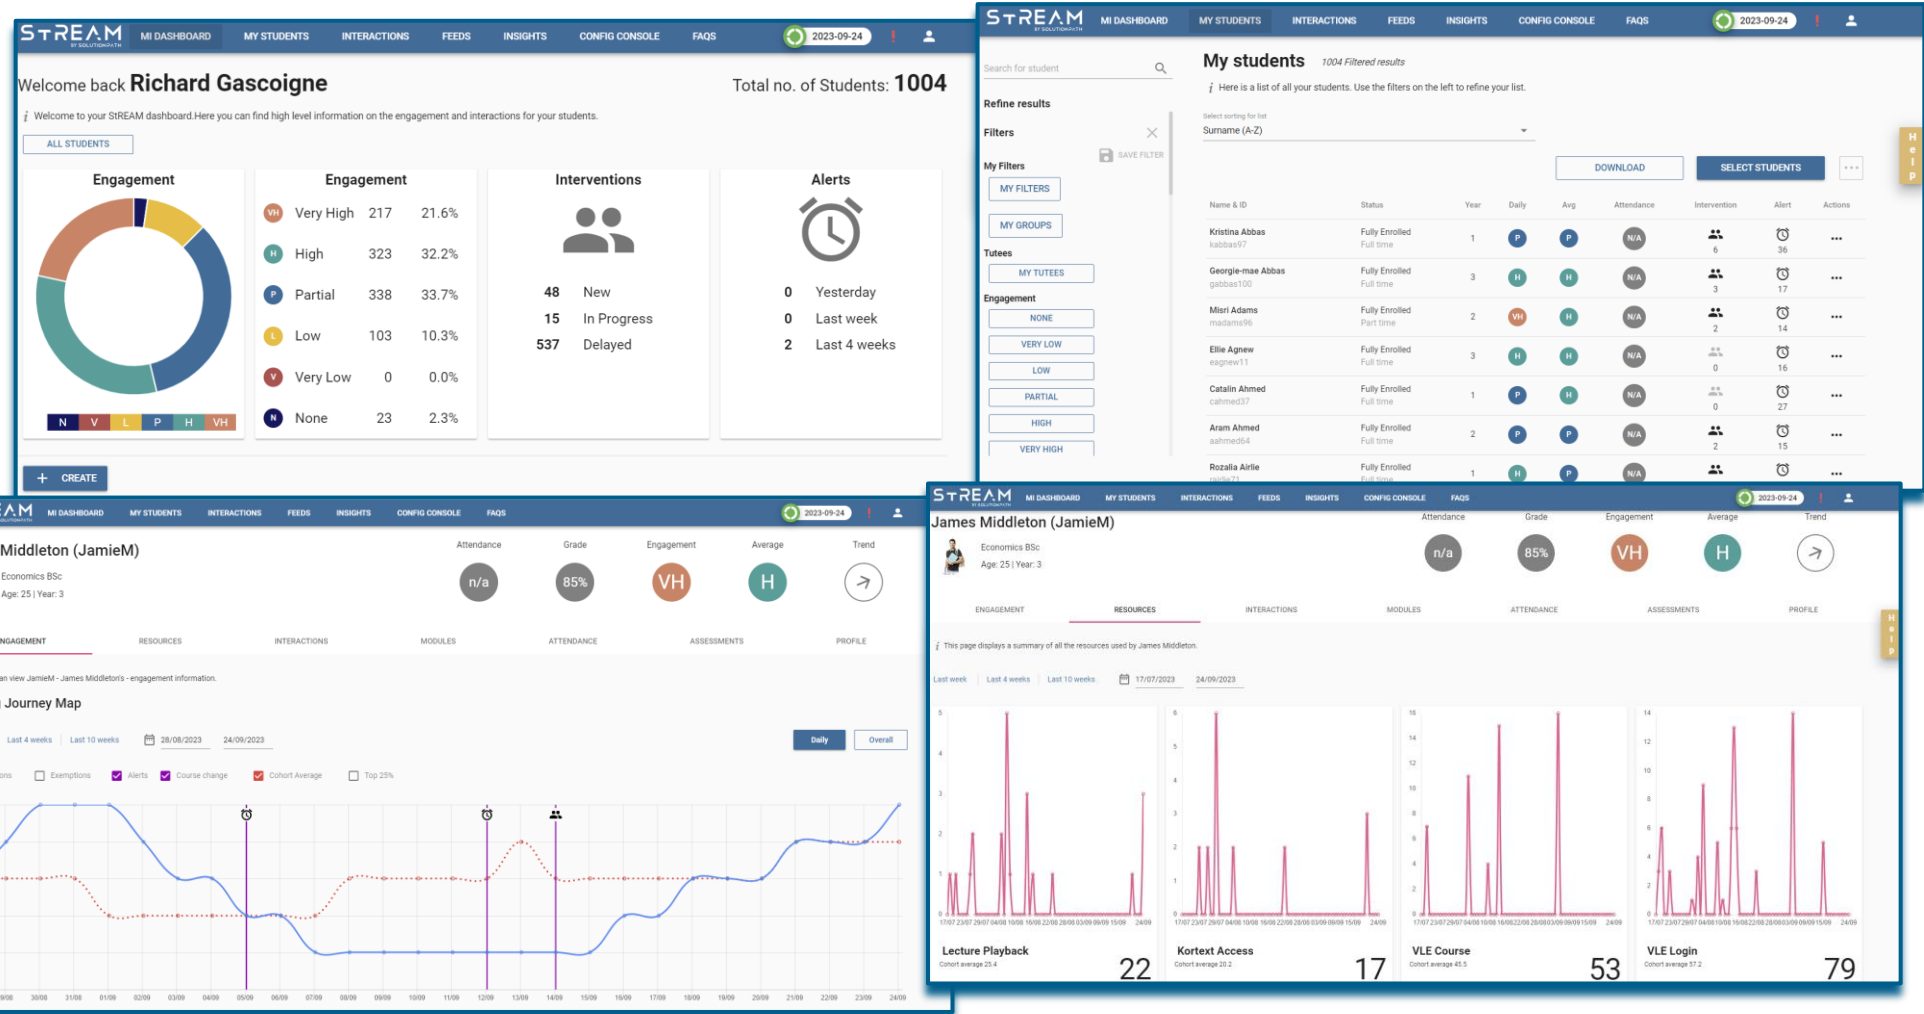

The University of Manchester is piloting the Kortex Premium tools across a number of programmes this academic year:

“We are very interested in trialling these types of engagement tools to see how students will take up and use these capabilities and as importantly, we are going to work with individual faculty members to understand academic reaction to them too.”

StREAM learner analytics supports multiple stakeholders...

- Academics
- Students
- Student academic advisors
- Student welfare
- University Leadership
