Creating an Environment to Support Pedagogical Development

Dr Joanna Hendy
Director of Learning Enhancement
Quality Enhancement Directorate
Cardiff Metropolitan University

Quality Enhancement Directorate (QED)

- Deliver an integrated, collaborative approach to quality enhancement, spanning the quality assurance provision and the enhancement and development of learning and teaching.
- Cyclical approach (example curriculum design process).

This presentation focuses on designing spaces for staff to support their personal learning journey and the wider learning and teaching environment.

Key Focus:

To show how we (QED) have consciously designed intentional spaces that:

1. Support cultural and transformational change.
2. Challenge existing narratives.
3. Provide space for collaboration.
4. Promote developmental practice.
5. Create a sense of identity.
6. Raise the profile of learning and teaching.
7. Provide an opportunity to network.
8. Provide space to think, work and feel energised.

Inspiration: Adobe trip to Utah University and Adobe Max conference
