

WONKHE

Course reps are dead horses. Stop flogging them

Your course rep system doesn't work,
and it never will. Ever.

MONTH 2024

JIM DICKINSON | WONKHE @JIM_DICKINSON |
JIM@WONKHE.COM

A little history

- Course reps were introduced in the late 70s and early 80s when UK universities operated with typewriters, noticeboards, and fixed line telephones.
- They facilitated communication between students and academics who had considerable autonomy.
- The world has changed with the National Student Surveys, comprehensive data dashboards, mid-module and end-of-module feedback, and social media insights.
- Modern technology allows universities to monitor student engagement and predict outcomes without direct interaction.
- Course rep systems were initially popular, declined in the late 80s, and resurged with the Quality Assurance Agency's influence in the 90s.
- The emphasis on structured systems hindered creativity, prioritizing "systems" over true "partnership" in addressing student experiences.

WONKHE

**There's too
many of them
and not enough
of you**

WONKHE

The folded arms problem

WONKHE

**Other
evidence is
available**

WONKHE

**They're not
enabled to make
judgements**

WONKHE

**Systems dissipate
problems rather
than cause action**

WONKHE

**It's about the
university
not students**

WONKHE

**Voice doesn't
work for
unacceptables**

WONKHE

**Decisions aren't
made at their
level**

WONKHE

**It's not the role
they wanted**

WONKHE

**They're on
their own**

WONKHE

**Meetings are
awkward or
pointlessly
comforting**

WONKHE

**Decisions aren't
made at their
level**

WONKHE

**There's no link to
the democratic
structures**

WONKHE

**They don't
have the time**

WONKHE

**They don't know
enough people**

WONKHE

**We persist with
electing them**

WONKHE

They miss minority issues

WONKHE

**They over-focus on
minority issues**

WONKHE

**It's really really
boring**

WONKHE

**They don't
change anything**

A little history

- Course reps were introduced in the late 70s and early 80s when UK universities operated with typewriters, noticeboards, and fixed line telephones.
- They facilitated communication between students and academics who had considerable autonomy.
- The world has changed with the National Student Surveys, comprehensive data dashboards, mid-module and end-of-module feedback, and social media insights.
- Modern technology allows universities to monitor student engagement and predict outcomes without direct interaction.
- Course rep systems were initially popular, declined in the late 80s, and resurged with the Quality Assurance Agency's influence in the 90s.
- The emphasis on structured systems hindered creativity, prioritizing "systems" over true "partnership" in addressing student experiences.

What could be done?

- Groups, groups, groups
 - Identity, priority, support, agenda
- Compulsory module evaluation (inc engagement reflection)
- In the room where decisions are made
- Link back to democratic structures
- Multiple “helpful” roles
- Who wants to be involved?
- Codes, standards and judgements
- Acting on evidence not sources of evidence
- Loop closure
- Unacceptables OUT
- Clarity over role of curriculum
- Shared resp over success of a cohort
