

Together we **SHAPE** Tomorrow!

Our manifesto for the best student life in the world

Overview

The aim of **Together We Shape Tomorrow** is to create a longer-term view of the student experience, building on our unique and embedded Top-Ten approach.

We've been in reactive times. We felt this needed to change.

As a students' union we've mapped out a manifesto for the student experience – essentially a roadmap for the next five years.

We've been bold as we feel Bath has the ingredients to create the best student life in the world.

We believe we have the intel and engagement to provide the university with trusted strategic direction based on students' need.

We recognise we are in resource constrained times, so this isn't just about more money, it's about working together to do things differently.

Our ask today is for you to engage with us on this, so we can collectively deliver the best student life for our students.

Insight

We used a range of methods and existing data, research, and insight to inform our manifesto.

Over **2,000** postcards completed by current students, equating to **over 11,500** individual comments.

Nearly **800** comments recorded during June 2024 Open Days from prospective students.

Almost **900** respondents to the Together We Shape Tomorrow Survey.

40 Student Leaders participated in facilitated workshops.

Triangulated with SU, University, and national student survey data, feedback from student representatives, and sector knowledge.

1

The University of Bath will offer the most accessible university experience in the world

2

We will be the most empowered students in the world, and this will help us change the world

3

Bath will be the best city in the world to be a student

4

The University of Bath will be the most healthy and supportive student community in the world

5

Our learning experience at University of Bath prepares us to shape the world

6

The University of Bath will excel from the strongest, most constructive partnership between students and their university in the world

What Next?

Our ask is for engagement from across the University leadership team on where we take this work next.

We think we have a roadmap that can ensure Bath builds on its current successes but in a way that is sustainable and empowers students to thrive.

As a next step, we suggest that we have a set of strategic discussions – both centrally and at Faculty/School level.

We hope from these discussions; we can create strategic partnership projects that can deliver improvements to the student experience over the coming years.

To move these goals forward, it is vital we work together to identify opportunities and build alignment with the wider strategic ambitions of the university.

Together We Shape Tomorrow.
